Leadership has been a part of who I am for most of my life. As an ambitious leader who adapts quickly to change, I am fully prepared to help continue the wave of success with the I am Abel Foundation.

For starters, I started my education journey at UIC where I obtained my Bachelor's Degree in Criminology and minor in Biological Sciences. I've always wanted to be a doctor but continued to put it off after being discouraged on several occasions. After graduating, I switched gears and became a Senior level education consultant who assisted students in furthering their education from Associates Degree to Doctoral level. After obtaining my MBA with Northwestern, I decided it was time to go after my passion which was healthcare and serving in my community. Simultaneously, I maintained great academic progress and tutored underprivileged children in Chicago with subjects of math, science, history, and reading with the After School Matters Program. Moving forward, I now work as a medical assistant which is giving me the experience I need to jumpstart my journey to medicine.

On another note, I have a history of leading others to successful outcomes in a professional and personal setting, and I believe I would be the ideal candidate for this position. Furthermore, my goal as a leader in this foundation, will be to make sure every person, no matter where they are in their journey, feels like they are making process, are motivated, and know their goals are attainable no matter the size!

Lastly, I'm excited by all the challenges inherent in the position and look forward to the opportunities it presents. I want to thank you for considering me to join this fantastic foundation of innovators and creatives, and I look forward to hearing from you.

Sincerely,  
Brittany Wilson
